

# ESSENTIAL TOOL PROGRAM

## Mopar Diagnostic Pod (MDP)

OCTOBER 2020

We are pleased to announce that FCA will soon be deploying the MOPAR Diagnostic Pod (MDP), an essential tool for wiTECH 2.0 and wiADVISOR that provides required advancements for your dealership.

The MDP is required to diagnose and repair the 2021 WL and other upcoming FCA vehicles equipped with the Atlantis High vehicle architecture. The Atlantis High architecture incorporates new vehicle communication technology (CAN FD, Ethernet) that the current microPod does not support.

---

**You spoke and we listened. Based on feedback we have received from dealers regarding current microPods, we are now including a protective boot to improve durability and robustness as well as a two-year warranty for the MDP.**

---

The MDP Essential Kit includes all the necessary hardware and accessories. Each Kit includes one (1) MDP device, one (1) Protective Boot, one (1) Trigger Adapter and one (1) USB cable. Additional MDP devices and accessories will be available for purchase after the initial deployment to North American dealers is complete.

The cost of the MDP Essential Kit is \$525.00, which includes the MDP device, protective boot, and USB cable (\$500.00), as well as the Trigger Adapter (\$25.00).

The initial rollout of the MDP Kit to FCA North American dealerships is planned to begin late Q4 2020. Setting up and configuring the MDP for your dealership is very similar to the microPod. Please follow the instructions provided in the Quick Start Guide included with the MDP Essential Kit package and contact the wiTECH Support at 1-888-wiTECH-1 (1-888-948-3241) should you require further assistance. Attached are some frequently asked questions that can assist you in addressing any questions or concerns. For more information, please review the MOPAR Diagnostic Pod (MDP) section of the wiTECH 2.0 Knowledgebase (<https://kb.fcawitech.com>).

We are excited to work with you to implement this new and essential technology.
