

Description:

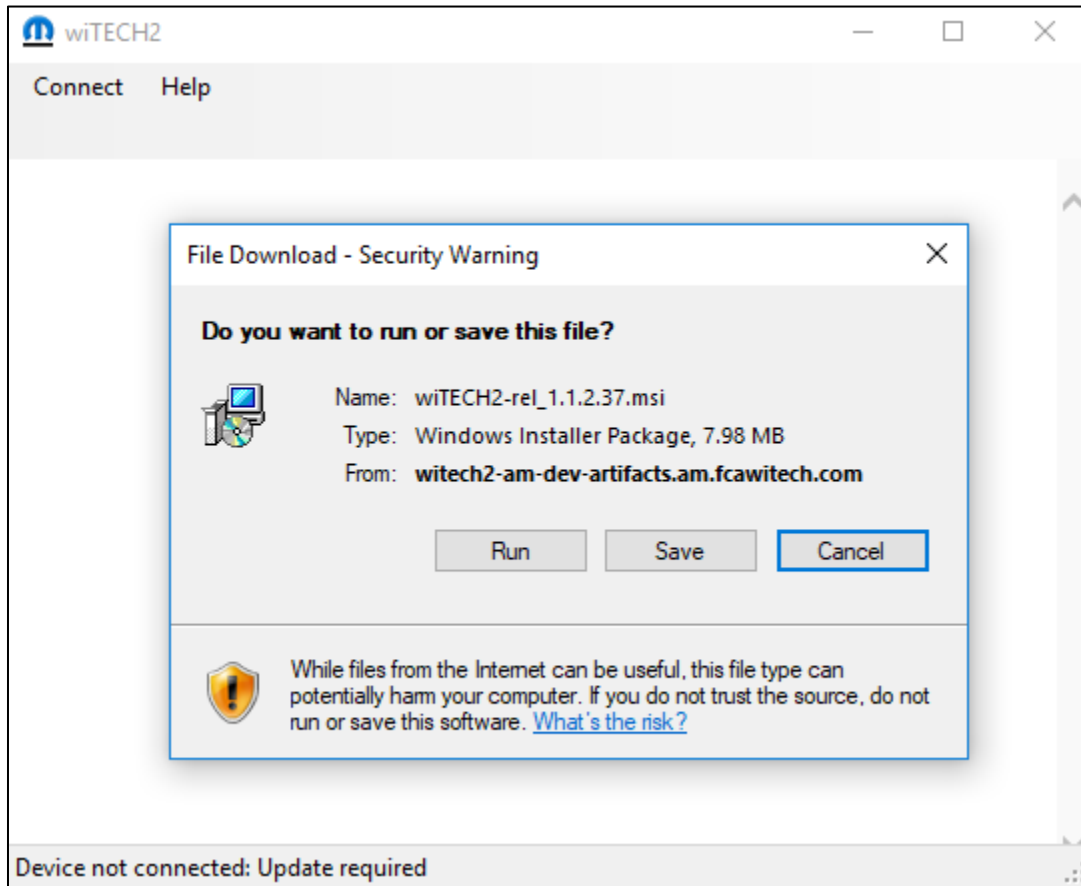

This message is seen/caused by one of the following:

- PC does not have internet access
- PC serial number is not registered
- License has expired

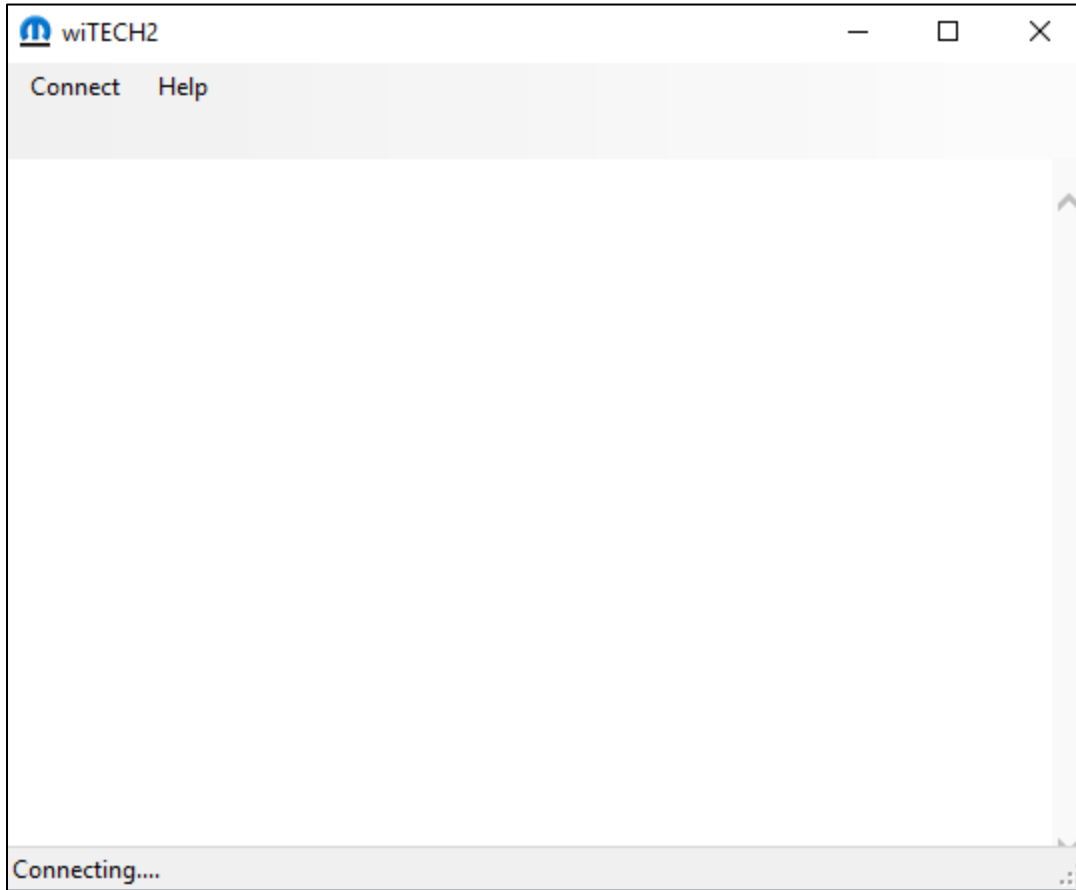

Description:

The user needs to connect to the device by clicking on "Connect" and selecting the device from the menu.

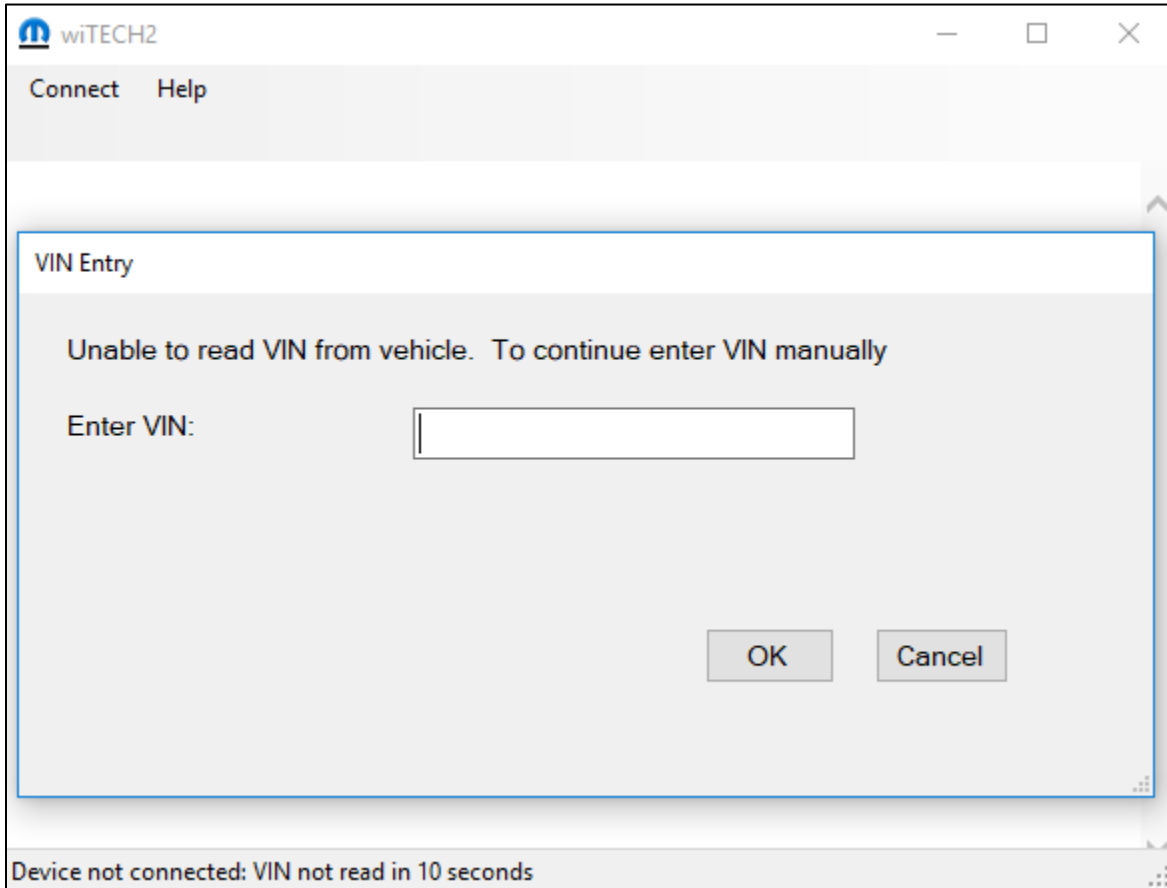

Description:

There is an update available to the wiTECH 2.0 J2534 application.

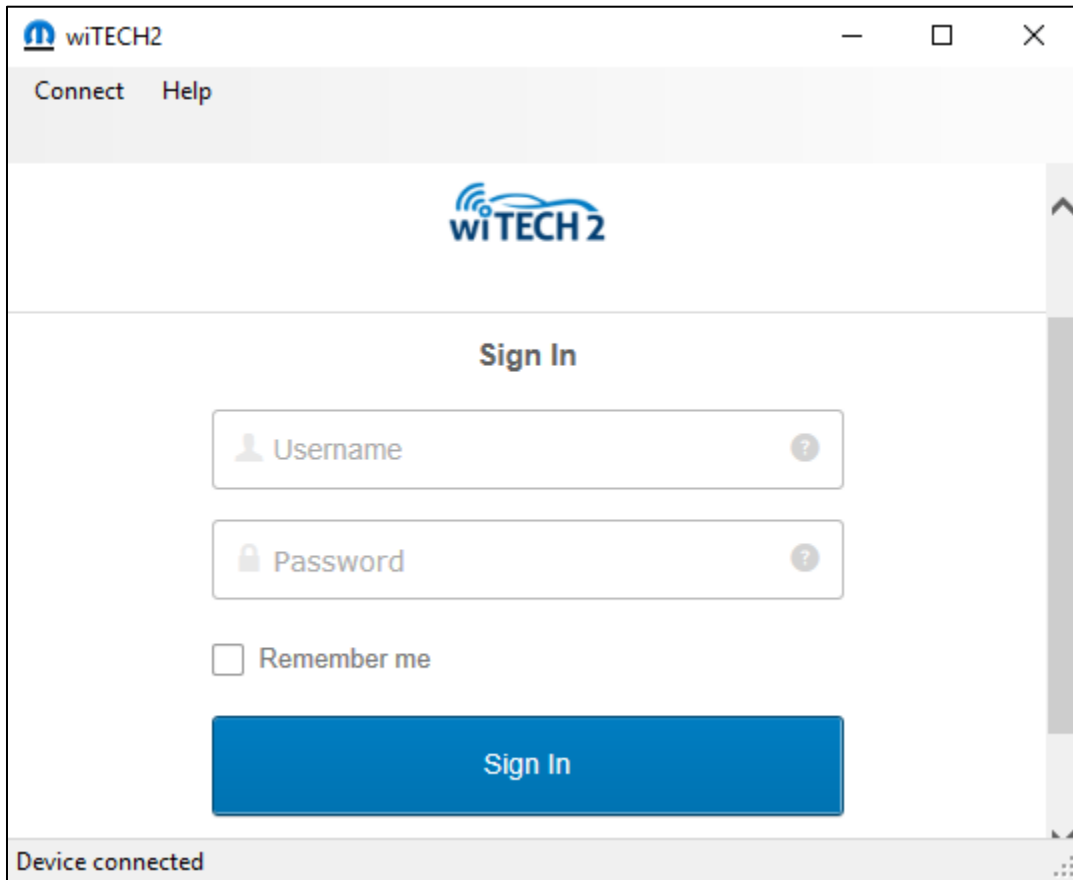

Description:

wiTECH 2.0 is connecting to the J2534 device and attempting to read the VIN.

Description:

wiTECH 2.0 is unable to read the VIN. The user must enter the VIN manually. One common cause is that the ignition is not in the "RUN" position.

Description:

wiTECH 2.0 J2534 application is connected to the vehicle successfully. The user must login to wiTECH 2.0 to use the application.
