Note: The VCI (Vehicle Communication Interface) device requires the wireless network to have password protected authentication. You will not be able to connect the VCI to a public wireless network.

1. To begin, start the VCI Setup Utility, and click the **Wireless Configuration** button. If you have not yet downloaded the **VCI Setup Utility** then please navigate to step one of [How-To Setup Your microPod - Aftermarket](#) .

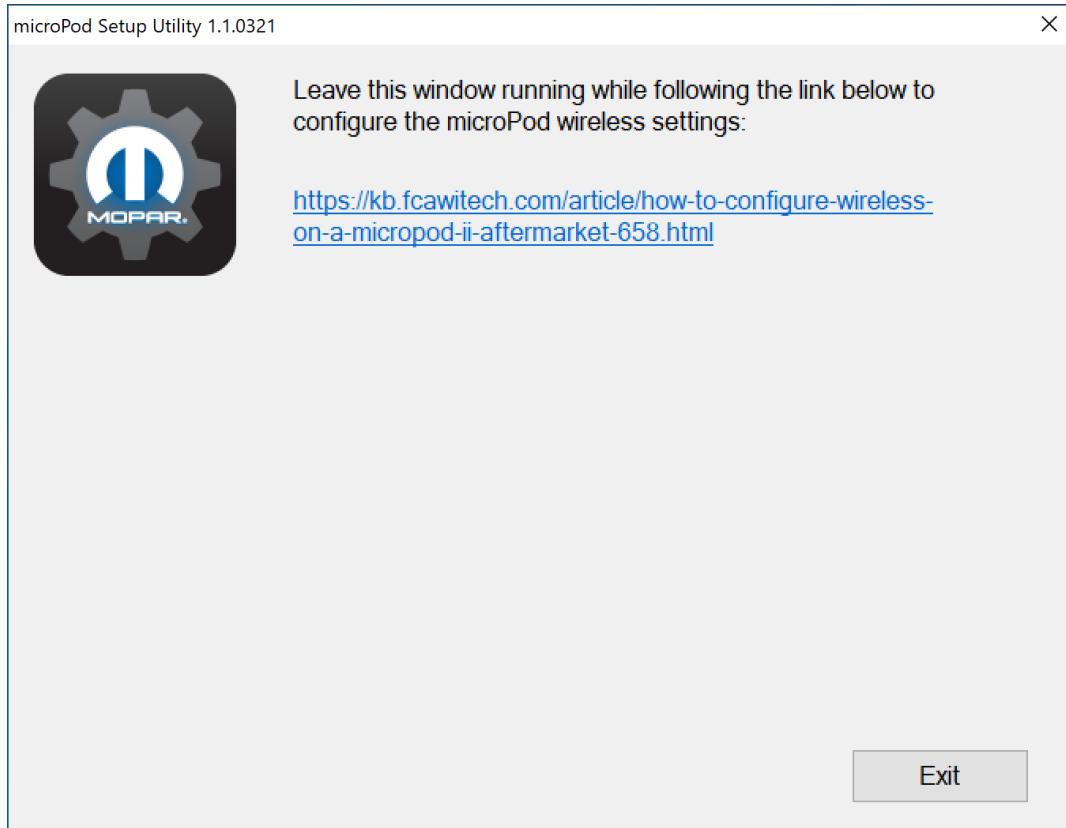

2. Make sure that the VCI device is connected to the PC with a USB cable, and then click the **Continue** button.

3. Leave the following window open while you configure your VCI device.

The Setup Utility provides internet access to the microPod II so that it can be configured for a wireless network.

If the VCI device has not been configured for wireless, and the Setup Utility is not running, it will not display in the wiTECH 2.0 vehicle selection screen.

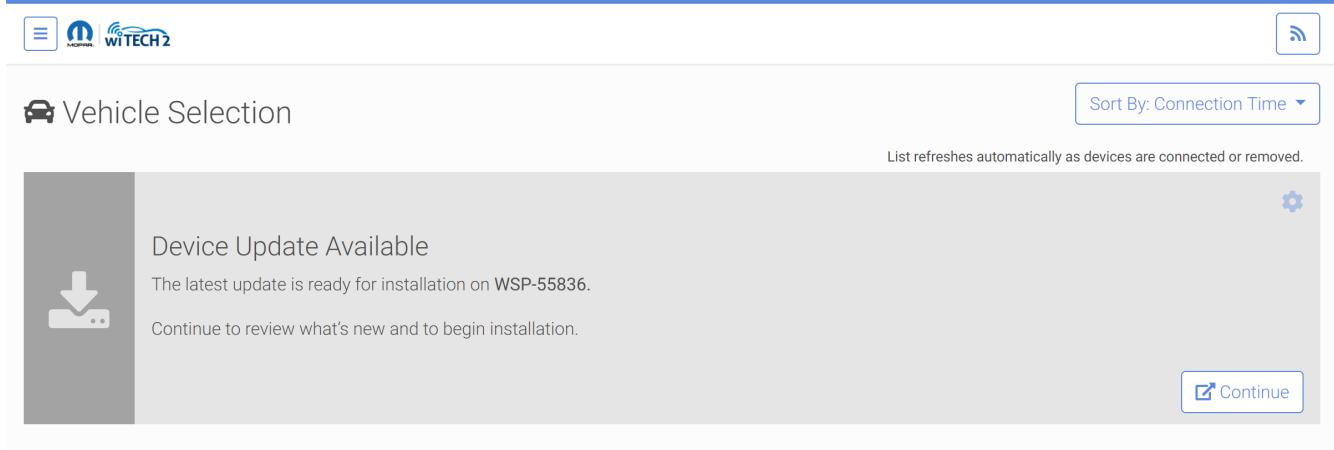

4. You will now have to sign in to wiTECH 2.0 to view and configure your device. Navigate to the Okta user login through the following link.

<https://login.am.fcawitech.com>

5. Fill in your Okta **Username** and **Password**, and then click **Sign In**.

6. If your VCI is connected to your PC with a USB cable, has a subscription tied to it, and has you added as a user of that VCI, then it should appear in the Vehicle Selection window as shown below.

6a. If you have not yet updated your VCI, then you will see the following screen. To configure the wireless network, you will first need to update your VCI by selecting **Continue** and navigating the update prompts.

Vehicle Selection

Sort By: Connection Time ▾

List refreshes automatically as devices are connected or removed.

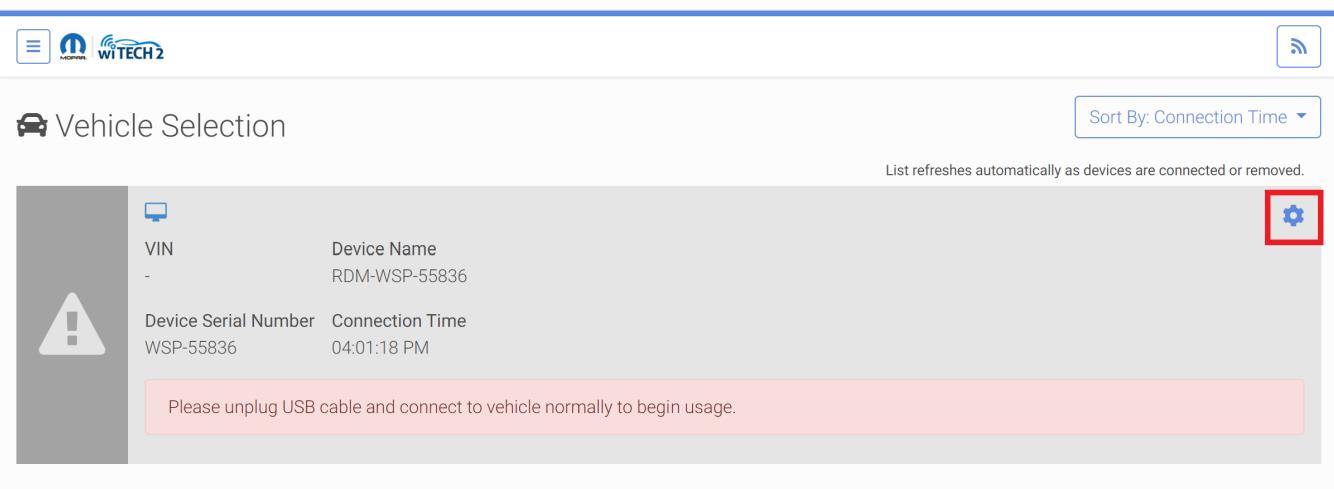

Device Update Available

The latest update is ready for installation on **WSP-55836**.

Continue to review what's new and to begin installation.

Continue

6b. If you have already updated your VCI, then you will see the following screen. To configure the wireless network, click the **gear** icon located at the top right of the vehicle window.

Vehicle Selection

Sort By: Connection Time ▾

List refreshes automatically as devices are connected or removed.

VIN Device Name
- RDM-WSP-55836

Device Serial Number Connection Time
WSP-55836 04:01:18 PM

Please unplug USB cable and connect to vehicle normally to begin usage.

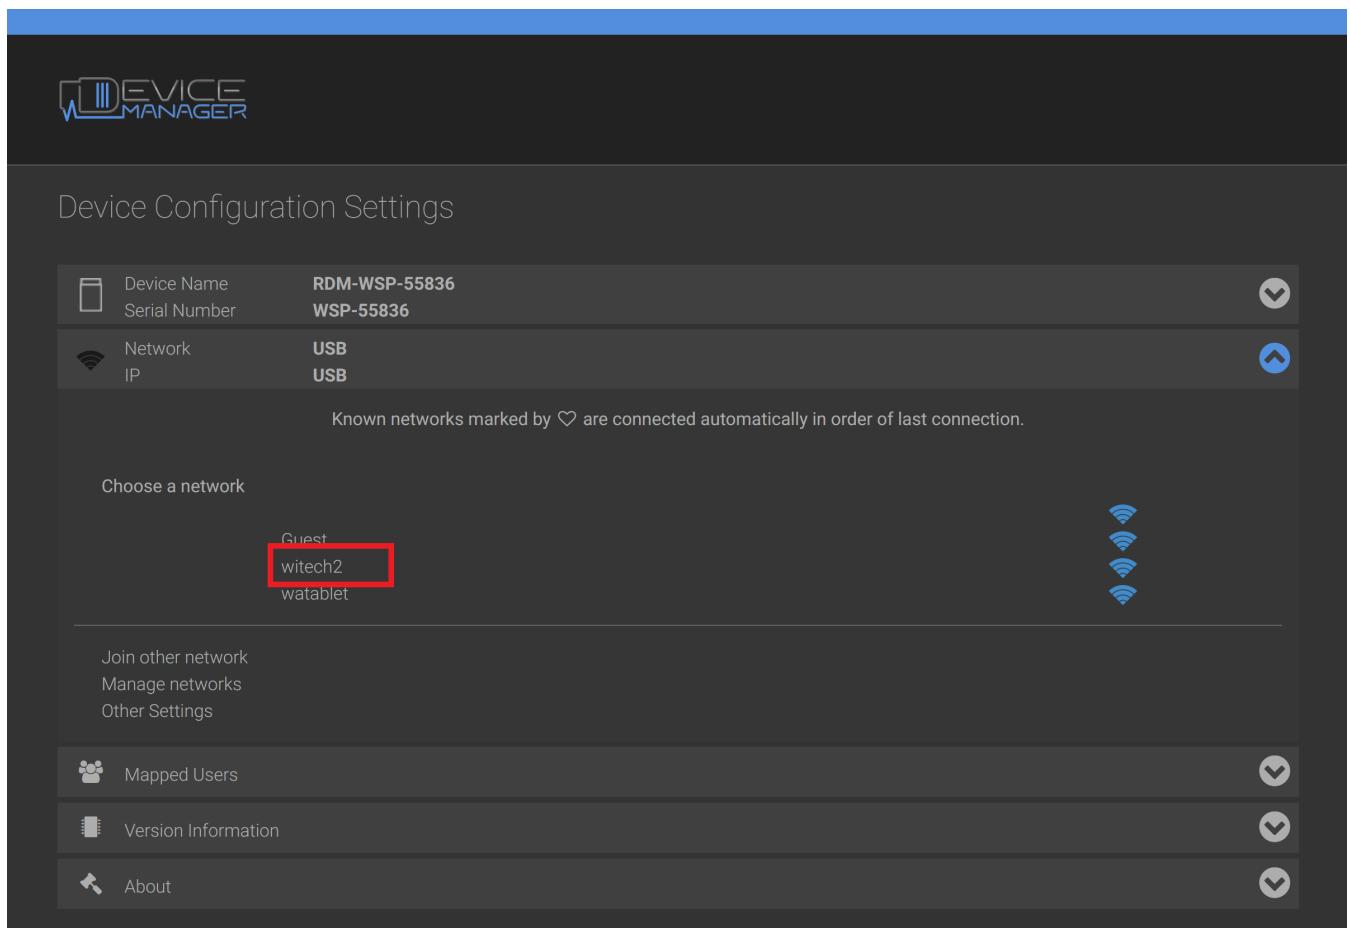

7. You will then see the Device Manager page. Click the drop down arrow on the Network tab to view available wireless networks.

Device Configuration Settings

| | | | |
|--|---------------------|---------------|--|
| | Device Name | RDM-WSP-55836 | |
| | Serial Number | WSP-55836 | |
| | Network | USB | |
| | IP | USB | |

| | About | | |

8.1. If your desired wireless network shows up in the network list, you can simply click the network name.

The screenshot shows the 'Device Configuration Settings' screen of the Device Manager application. At the top, the device name is listed as 'RDM-WSP-55836' and the serial number as 'WSP-55836'. Below this, the network configuration is shown as 'USB' for both Network and IP. A note indicates that known networks marked with a heart icon are connected automatically. The 'Choose a network' section lists 'Guest', 'witech2' (which is highlighted with a red box), and 'watablet'. To the right of the network list are four small blue Wi-Fi icons. Below the network section are links for 'Join other network', 'Manage networks', and 'Other Settings'. At the bottom, there are sections for 'Mapped Users', 'Version Information', and 'About'.

Device Configuration Settings

Device Name: RDM-WSP-55836
Serial Number: WSP-55836

Network: USB
IP: USB

Known networks marked by  are connected automatically in order of last connection.

| | About | |

8.2.1. Fill in the **SSID (Wireless Network Name)**, **Password**, and then click **Connect**.

9. If your network connection was successful, you should see the network name and IP address appear in the Network bar.

The network will also appear in the network list with a checkmark next to it, signifying that it is the connected network profile on your VCI device.

Device Configuration Settings

| | | | |

10. Now that the VCI device has a valid wireless network, you can close the VCI Setup Utility by clicking the **Exit** button.

Leave this window running while following the link below to configure the microPod wireless settings:

<https://kb.fcawitech.com/article/how-to-configure-wireless-on-a-micropod-ii-aftermarket-658.html>

Exit

11a. If your device was correctly configured, it should remain, or reappear, in the Vehicle Selection window without the VCI Setup Utility running. This image is what the page will display if your pod WiFi setup was successful.

The screenshot shows the 'Vehicle Selection' window of the WiTECH software. At the top, there are navigation icons for 'Home', 'WiTECH', and a 'WiTECH' logo. On the right, there is a 'Sort By: Connection Time' dropdown and a 'List refreshes automatically as devices are connected or removed.' message. The main table lists a single device: 'RDM-WSP-55836' (Device Name), 'WSP-55836' (Device Serial Number), and '04:24:05 PM' (Connection Time). A note at the bottom of the table says 'Please unplug USB cable and connect to vehicle normally to begin usage.' The 'VIN' column has a warning icon.

| Device Name | Device Serial Number | Connection Time |
|---------------|----------------------|-----------------|
| RDM-WSP-55836 | WSP-55836 | 04:24:05 PM |

Please unplug USB cable and connect to vehicle normally to begin usage.

11b. If the VCI device is not displaying in Vehicle Selection after closing the VCI Setup Utility or you are unsure of the success of the connection, then make sure the **Registration Application** is not running and unplug and plug back in your VCI via USB to your PC. If your pod displays in the vehicle selection, then the connection was a success.

If you close the VCI Setup Utility, and the VCI device disappears, and does not reappear after several seconds, then you will have to repeat the setup process to correctly configure a wireless network on your VCI.

Congratulations! Your VCI device is now ready for use with wiTECH 2.0 Aftermarket!!
