

Lost Phone or Tablet - Unable to log into Okta

Article Number: 812 | Rating: Unrated | Last Updated: Fri, May 4, 2018 4:12 PM

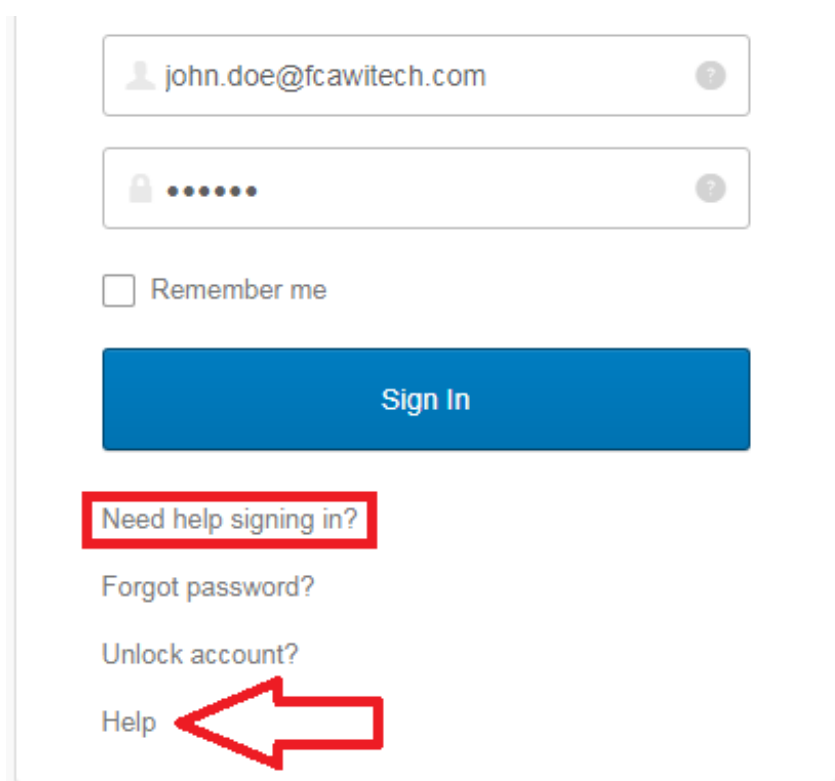

wiTECH 2 Aftermarket currently uses a Multifactor Authentication (MFA) during login. This is an additional security measure that has been added to keep all accounts and their information as secure as possible. There are currently 3 different ways to utilize MFA:

- Okta Verify Mobile App
- Google Authenticator Mobile App
- YubiKey

If you use Google Authenticator or Okta Verify for logging into your Okta account, you may lose all of your application data in the event that you lose or damage your phone or tablet. In order to prevent this, it is highly recommended that multiple devices (tablets, smart phones, etc.) are set up with your Okta account. For steps on how to setup multiple devices with Okta login, please view [Adding wiTECH 2 Aftermarket Okta Account to Google Authenticator or Okta Verify on Multiple Devices](#)

If you have already lost or damaged your phone or tablet and are unable to generate a login passcode with Google Authenticator or Okta Verify, please perform the following steps:

1. Go to <https://login.am.fcawitech.com/>
2. Select **Need help signing in?** then select **Help**

The screenshot shows the Okta login interface. At the top, there is a text input field containing the email address 'john.doe@fcawitech.com'. Below it is a password input field with six dots representing the password. Underneath the password field is a checkbox labeled 'Remember me'. A large blue button labeled 'Sign In' is positioned below the checkbox. Below the 'Sign In' button, the link 'Need help signing in?' is highlighted with a red rectangular box. Underneath this link are three options: 'Forgot password?', 'Unlock account?', and 'Help'. A red arrow points from the right towards the 'Help' link.

3. Under **More Help**, select **Request Help**.

Sign-In Help

Okta is an on-demand service that allows you to easily sign-in to all the applications your organization uses through a single login.

Once you sign in, your Okta home page displays all your applications in one location. Simply, click the application's corresponding icon and each application opens in a new browser window or tab and you are automatically logged-in.

4. A prompt will appear for sending a message for support. Please enter your email at the top, and select "Cannot log in" from the drop-down. See screenshot below for example message to send.

Send Message [X]

Enter the email we should use to contact you:

What do you need help with?

Message

Hello,

I lost my phone and all of my applications' data. Because of this, I am unable to log into wiTECH 2 Aftermarket. Can you please assist so I can set up my new phone with Okta?

Send Message

After all information has been provided, select **Send Message**.

5. Once all information has been submitted, and the wiTECH team has reset your account, you will receive an email

notification from the wiTECH team. At this time, please go to <https://login.am.fcawitech.com/> and attempt to login again - If you have not received an email from the wiTECH team, please wait to login until you receive an email.

Note: If you are able to login, but are still prompted to enter a 6-Digit Google Authenticator or Okta Verify passcode, please return to the login screen and try logging in again. If this issue persists, please contact the wiTECH Help Desk - [wiTECH Premium Support Helpdesk Contact Information](#)

6. Once logged on, please perform the necessary steps for setting up a Okta login. For steps on how to setup Google Authenticator or Okta Verify, please refer to steps 3 through 12 in [How-To Create an Okta Login Account](#)
