DRB III Emulator Powertrain Flash Errors

847 Will Flickema Thu, Jun 14, 2018 Enhanced DRB III Emulator 6002

If you encounter any error when trying to do a power train flash to a DRBIII vehicle with the DRBIII emulator, delete all files from the Low Folder.

(Some computers might have the folders hidden. To Show hidden files and folders, please follow the steps below)

Windows 10

1. In the search box on the taskbar, type **folder**, and then select **Show hidden files and folders** from the search results.
2. Under **Advanced settings**, select **Show hidden files, folders, and drives**, and then select **OK**.

Windows 8.1

1. Swipe in from the right edge of the screen, then select **Search** (or if you're using a mouse, point to the upper-right corner of the screen, move the mouse pointer down, and then select **Search**).
2. Type **folder** in the search box, then select **Folder Options** from the search results.
3. Select the **View** tab.
4. Under **Advanced settings**, select **Show hidden files, folders, and drives**, and then select **OK**.

Windows 7

1. Select the Start button, then select **Control Panel > Appearance and Personalization**.
2. Select **Folder Options**, then select the **View** tab.
3. Under **Advanced settings**, select **Show hidden files, folders, and drives**, and then select **OK.**

RESOLUTION

Step 1: Navigate to the following folder:

C:Users<User_Account_Name>AppDataLocalTempLow

Step 2. Delete all files in the Low Folder

Step 3. Then launch TechTOOLS and download the flash for the vehicle again

Step 4. Launch the DRBIII Emulator and try the flash again and it should work.

If that does not fix the problem, just give the wiTECH Help Desk a call at 888-948-3241 for further assistance.
