Mopar Diagnostic Pod Overview

983 Chris Ordner Tue, Jul 13, 2021 MDP (Mopar Diagnostic Pod) 14873

Mopar Diagnostic Pod (MDP) is an essential tool for wiTECH 2.0 and wiADVISOR that provides required advancements for your dealership. The MDP is required to diagnose and repair the 2021 WL and other upcoming Stellantis vehicles equipped with the Atlantis High vehicle architecture. The Atlantis High architecture incorporates new vehicle communication technology (CAN FD, Ethernet) that the current microPod does not support.

The essential deployment of MDP to Stellantis dealerships is currently underway.

The MDP will be available for daily sales soon in the Technical Service Portal (www.witechsystem.com).

MDP key benefits:

- Supports new vehicle communication technology
    - CAN FD and Ethernet
- Required for 2021 WL and future Stellantis programs
- Supports all vehicles that current microPod II supports
- Increased warranty period (2 years)
- Increased speed and performance
    - Improved memory, processor, and Wi-Fi
- Rubber case (boot) for increased durability
- MDP and boot are “Mopar Blue”
- The protective boot will also fit the microPod II
